Nmap Live Host Discovery – TryHackMe Completed!

I'm excited to share that I've successfully completed the Nmap Live Host Discovery room on TryHackMe as part of my cybersecurity learning journey.

In this room, I gained hands-on experience with:-

1) Understanding host discovery techniques
2) Using ICMP, TCP SYN, TCP ACK, and ARP ping scans
3) Identifying live systems in a network efficiently
4) Bypassing firewall restrictions for accurate scanning

One key takeaway:-

Host discovery is a crucial first step in penetration testing—it helps reduce noise and focus only on active targets.

Tools used:-

- Nmap

This exercise strengthened my practical knowledge of network scanning and reconnaissance techniques. Looking forward to diving deeper into penetration testing and ethical hacking!
