

## Step 1:

First we download the Rufus is a lightweight, open-source tool for creating bootable USB drives. It's commonly used to install operating systems like Windows, Linux, or other live environments. Rufus is highly regarded for its speed, ease of use, and reliability.

The screenshot shows a web browser window with the address bar displaying <https://rufus.ie/en/>. The page content includes a list of use cases, a download button, a table of latest releases, and system requirements.

It can be especially useful for cases where:

- you need to create USB installation media from bootable ISOs (Windows, Linux, UEFI, etc.)
- you need to work on a system that doesn't have an OS installed
- you need to flash a BIOS or other firmware from DOS
- you want to run a low-level utility

Despite its small size, Rufus provides everything you need!

A non exhaustive list of Rufus supported ISOs is also provided at the bottom of this page. <sup>(1)</sup>

**Download**

**Latest releases:**

Link	Type	Platform	Size	Date
<a href="#">rufus-4.6.exe</a>	Standard	Windows x64	1.5 MB	2024.10.21
<a href="#">rufus-4.6p.exe</a>	Portable	Windows x64	1.5 MB	2024.10.21
<a href="#">rufus-4.6_x86.exe</a>	Standard	Windows x86	1.6 MB	2024.10.21
<a href="#">rufus-4.6_arm64.exe</a>	Standard	Windows ARM64	5.1 MB	2024.10.21

[Other versions \(GitHub\)](#)  
[Other versions \(FossHub\)](#)

**System Requirements:**  
Windows 8 or later. Once downloaded, the application is ready to use.

**Supported Languages:**

The browser's taskbar at the bottom shows the system clock as 02:23 PM on 22-11-2024, with a temperature of 27°C and a sunny weather forecast.

Step 2:

Second we download hiren's BootCD (commonly abbreviated as HBCD) is a powerful and versatile toolkit used for system diagnostics, recovery, and troubleshooting. It contains a wide range of utilities to assist with tasks such as repairing corrupted systems, recovering data, removing viruses, and managing partitions.
