

## Linux Fundamentals – Part 1 | TryHackMe

I've successfully completed Part 1 of the Linux Fundamentals machine on TryHackMe. This lab helped me build a strong foundation in Linux, which is essential for anyone starting in cybersecurity and ethical hacking.

What I learned in Part 1:-

- 1) Understanding the Linux file system structure
- 2) Basic Linux commands (ls, cd, pwd, mkdir, rm)
- 3) Working with files & directories
- 4) Using the Linux terminal efficiently
- 5) Importance of Linux in security environments

This is just the beginning, and I'm excited to continue with the next parts to strengthen my hands-on skills.

Step by step, learning by doing :-

🔗 Platform: TryHackMe

📁 Room: Linux Fundamentals – Part 1
